MARITIME ACADEMY

TRAINING COURSES WORLDWIDE

Creating perspectives
MARITIME ACADEMY - CREATING PERSPECTIVES

We strongly believe that investment in training allows companies to take control of their future. Competence is built on knowledge, and this leads to greater personal and corporate success. With our increased global network and one of the broadest portfolios in the maritime industry we are able to exploit best practices and offer you a comprehensive training programme.

OUR OBJECTIVES

■ To help you effectively improve your business performance
■ To share the expertise available inside DNV GL with you
■ To empower you to move forward and reach your own goals

Operating in more than 100 countries, we have Academy managers in 18 key locations dedicated to enable you to manage your business in the best possible way and to assist you in finding the best solutions for your daily business to become safer, smarter and greener.

PUBLIC, IN-HOUSE OR TAIIRED

All courses can be offered as public or as in-house courses at your premises (e.g. at your offices, onboard one of your ships or at one of your workshops).

If we do not have an existing course on the topic you have in mind, we will work with you and develop a special course or training programme to suit your company’s specific needs.

DEVELOPING PEOPLE

OPERATING SHIPS

BUILDING SHIPS

OUR MODULAR SYSTEM

Our new course portfolio is based around three core themes:

■ Developing People
■ Operating Ships
■ Building Ships

These themes reflect major fields of activity in the maritime industry and our modular system is structured accordingly.

Each column within the themes represents a different category and contains several courses. All those seeking training can approach the search for a course from their own perspective. For example, you can search directly for the technical topic or for the kind of qualification required by the learner. You will notice therefore, that some of the course titles appear more than once since they fulfil both requirements.

How to read our modular system

Standard course
Provides necessary background knowledge about topic

Advanced course
Builds on existing level of knowledge about topic

Exam course
Leads to a (required) qualification

Premium class
Course where special conditions apply either in relation to trainer, location or equipment to run the course

Country
Course usually available only in this country
### Developing People

About DNV GL

DNV GL is a global quality assurance and risk management company. Driven by our purpose of safeguarding life, property and the environment, we enable our customers to advance the safety and sustainability of their business. Operating in more than 100 countries, our professionals are dedicated to helping customers in the maritime, oil & gas, power and renewables and other industries to make the world safer, smarter and greener.

DNV GL is the world’s leading classification society and a recognized advisor for the maritime industry. We enhance safety, quality, energy efficiency and environmental performance of the global shipping industry - across all vessel types and offshore structures. We invest heavily in research and development to find solutions, together with the industry, that address strategic, operational or regulatory challenges.
